1. COMPANY OVERVIEW

DTown Robotics (DTR) is a leading Indian technology company specialising in the design, development, and manufacturing of drones, robotics, and Unmanned Ground Vehicles (UGVs). Founded in 2018 and headquartered in G-294, Sector 63, Noida, Uttar Pradesh, DTR serves government, defence, and commercial clients across India and globally. As a GenZ tech company, DTR is committed to continuous innovation in robotics, AI, and IoT.

Core Capabilities

• Drone Design & Manufacturing	• Unmanned Ground Vehicles (UGVs)
• Robotic Systems Design & Manufacturing	• AI & Machine Learning Integration
• Custom Design & Development	• IoT-based Automation Systems
• Agricultural Precision Technology	• Defence & Surveillance Solutions

2. MISSION, VISION & OUR STORY

MISSION

Our mission at DTown Robotics is to empower industries with state-of-the-art drone technology and robotics solutions. We strive to deliver high-quality products and services that address the unique challenges of our clients, leveraging the latest advancements in robotics, AI, and IoT. Through strategic partnerships, skill development initiatives, and a focus on sustainable practices, we are dedicated to contributing to the growth and modernization of industries in India and globally.

VISION

Our vision is to revolutionize industries through cutting-edge drone technology and robotics solutions. We aim to create a world where advanced automation and innovative robotic applications enhance efficiency, safety, and sustainability across various sectors — from defence to agriculture and beyond. Our commitment is to drive progress by fostering a culture of innovation, collaboration, and continuous learning.

OUR STORY

Our journey at DTown Robotics is a testament to the power of commitment, dedication, and a futuristic vision. From our humble beginnings in 2018, we set out to revolutionize the world of technology, driven by a passion to create innovative solutions that push the boundaries of what is possible. As a GenZ tech company, we are committed to staying ahead of the curve through continuous innovation. Our company's

journey was also featured on Amazon Prime Video's show 'Mission Start Ab', a milestone reflecting our national impact.

3. MESSAGE FROM THE FOUNDERS

As we look ahead at DTown Robotics, our excitement is palpable. Our primary focus is on completing our telepresence robot, equipped with fully articulated and controlled hands. This innovation is set to automate nearly 40% of daily tasks, revolutionizing human-technology interaction and setting a new standard in robotics.

Our journey is fuelled by your unwavering trust, support, and financial backing. With your help, we are not just building robots — we are crafting the future of technology. Our goal is to foster the Gen-Z robotics tribe, where advanced technology seamlessly integrates into everyday life, enhancing efficiency and simplifying tasks.

Together, we are pioneering a future where technology not only meets but anticipates human needs. We are grateful for your continued belief in our vision and your partnership in this transformative journey.

— Team DTown Robotics

Media Coverage & Recognition

DTown Robotics has been featured on Amazon Prime Video in the documentary series 'Mission Start Ab', showcasing the company's innovative journey and national-level impact in the robotics space. The company has also received coverage from various national news outlets, reflecting its growing presence in India's technology landscape.

4. UAV PRODUCTS — UNMANNED AERIAL VEHICLES

DTown Robotics offers a diverse portfolio of UAVs engineered for agriculture, surveillance, cinematography, and defence applications. Each platform is built for reliability, high performance, and ease of operation in real-world conditions.

4.1 AgRow UAV — Precision Agricultural Drone

The AgRow UAV (model: DTR-AgROW) is DTown Robotics' flagship agricultural drone. Purpose-built for precision spraying and crop management, it enables farmers to apply fertilizers, pesticides, and nutrients with greater accuracy, significantly reducing chemical usage while boosting productivity.

Key Benefits

• 40% Brighter and More Prosperous Farmers	• Autonomous Operation
• 30% Less Pesticide Usage	• AI-guided precision spraying
• 40% Water Savings	• Reduced human chemical exposure

Applications

• Spraying Nano Urea	• Organic Fertilizer Spraying
• Bio & Fertilizer Application	• Pesticides Application
• Bio Nutrients Delivery	• Herbicides Spraying

Technical Specifications

No.	Feature	Specification
1	Product Name	DTR-AgROW
2	Model Number	AgROW
3	Primary Operation	Spraying System
4	Payload Capacity	5 Litres
5	Flight Time	Up to 15 minutes
6	Range	500 metres
7	Country of Origin	India
8	Maximum Takeoff Weight	19 kg
9	Operating Altitude	400 metres (AGL)
10	Max. Spraying Height	30 metres (AGL)
11	Autonomous Operation	Yes
12	Operational Temperature	-10°C to 50°C

No.	Feature	Specification
13	Battery Type	Lithium Polymer Battery
14	Battery Parameter	12S 16,000 mAh Lithium Polymer Battery
15	Warranty	500 Landings / 1 Year

4.2 Flybox — Multi-Role UAV Platform

The Flybox is a versatile, medium-endurance UAV designed for multi-role operations. Its robust Ground Control System (GCS) integration and intelligent failsafe mechanisms make it suitable for surveillance, reconnaissance, and payload delivery missions.

Technical Specifications

Endurance	30 to 35 minutes
Range	Less than 5 km
Operating Altitude	Less than 400 m AGL
Max Launch Altitude	Less than 3,000 m ASL
UAV Weight	Less than 10 kg
Payload Capacity	Up to 5 kg
Gross Weight	15 kg
Camera Stabilization	2-Axis Gimbal
Video Resolution	1080p HD

GCS Features

• Pre-Flight Self Checks	• Return to Home on Low Battery
• UAV Health Monitoring	• Return to Home on Lost Communication
• Live Flight Parameters	• Real-Time Status Display

4.3 Monal 4K — Professional Surveillance UAV

The Monal 4K is a professional-grade surveillance UAV equipped with a high-resolution Sony CMOS camera, 3-axis gimbal stabilization, multi-constellation GNSS navigation, and military-standard (GLS) compliance. Designed for extended endurance missions in challenging environments, it is IP 65 rated.

Camera Specifications

• 3-Axis Gimbal Stabilized Camera	• Night Support Quality
• 8MP 1/1.7-inch Sony CMOS Sensor	• 4K Video Recording at 30 fps
• 6x Digital Zoom	• 2.7K Video Recording at 48 fps
• Auto Tracking	• JPEG / RAW / 8-bit / 12-bit Image Format

Full Technical Specifications

No.	Feature	Specification
1	Endurance	35 minutes
2	Wind Resistance	15 MPH
3	Operational Altitude	2,000 m AGL
4	Maximum Launch Altitude	3,000 m ASL
5	GNSS System	GPS + Galileo + BeiDou
6	Payload	Camera
7	Camera Sensor	8MP 1/1.7-inch Sony CMOS
8	Zoom	6x Digital Zoom
9	Image Format	JPEG / RAW / 8-bit / 12-bit
10	Video Format	MP4 / H.264 / H.265
11	Video Resolution (4K HDR)	3840x2160 @ 24/25/30 fps
12	Video Resolution (2.7K)	2712x1536 @ 24/25/30/48 fps 2.7K @ 24/25/30/48/50/60 fps
13	Video Resolution (1080p)	1920x1080 @ 24/25/30/60/120 fps
14	Flight Modes	Fully Autonomous, Loiter, Return to Home
15	Technical Life of UAV	5 Years / 500 Landings
16	Life of UAV Battery	2 Years / 1,000 Charging Cycles
17	Compliance	IP 65
18	Military Standard	GLS

Failsafe & GCS Features

• Return to Home on Low Battery	• UAV Health Monitoring
• Return to Home on Lost Communication	• Live Flight Parameters
• Pre-Flight Self Checks	• Real-Time Video Streaming & UAV Position

4.4 Nuno 4K — Compact Lightweight UAV

The Nuno 4K is DTR's compact, lightweight UAV weighing under 249 grams. It delivers impressive 4K video capability with a transmission range of up to 6 km, making it ideal for both professional and consumer-level aerial photography and monitoring missions.

Camera Specifications

• CMOS 1/3 inch Sensor	• 2.7K Video at 30/25/24 fps
• F2.2 Aperture	• 1080P Video at 60/50/30/25/24 fps
• Photo Resolution: 4,608 x 2,592	• Video Format: MP4 (H.264)
• 4K Video at 30/25/24 fps	• Image Format: JPG / JPG+RAW (BNG)

Full Technical Specifications

No.	Feature	Specification
1	Max Flight Time	32 minutes
2	Range	Less than 4 km
3	Weight	Less than 249 grams
4	Operating Temperature	-10°C to 40°C (14°F to 104°F)
5	Max Takeoff Altitude	Less than 3,000 m ASL (up to 4,000 m absolute)
6	Camera Sensor	CMOS 1/3 inch
7	Aperture	F2.2
8	Photo Resolution	4,608 x 2,592
9	Video Format	MP4 (H.264)
10	Video Resolution	4K@30/25/24fps 2.7K@30/25/24fps 1080P@60/50/30/25/24fps
11	Max Ascent Speed	5 m/s
12	Max Descent Speed	5 m/s
13	Max Horizontal Speed	16 m/s (ASL)
14	GNSS System	GPS + Galileo + BeiDou
15	Max Transmission Distance	6 km
16	Image Format	JPG / JPG+RAW (BNG)
17	Battery	2,250 mAh Lithium Battery, 2S
18	Image Transmission Delay	200 ms

Failsafe & GCS Features

• Return to Home on Low Battery	• UAV Health Monitoring
• Return to Home on Lost Communication	• Live Flight Parameters
• Pre-Flight Self Checks	• Real-Time Video Streaming & UAV Position

5. UGV PRODUCTS — RHINO UNMANNED GROUND VEHICLE

The Rhino is DTown Robotics' flagship Unmanned Ground Vehicle (UGV). It is a heavy-duty, all-terrain robotic platform engineered for logistics support, bomb disposal, surveillance, and reconnaissance. With a 300 kg payload capacity, 4x4 off-road drive, and up to 4 hours of runtime, the Rhino is designed for the most demanding operational environments.

Key Features

• Payload: Up to 300 kg (Logistics & Support)	• 4K Video Resolution (4096 x 2160)
• Runtime: Up to 4 hours (Long Endurance)	• Camera Upgradeable per Requirement
• 4x4 Drive for Off-Road Operations	• Tank (Skid) Steering System
• 6x Digital Zoom Camera	• IP 65 Rating Upgrade Available

Full Technical Specifications

No.	Feature	Specification
1	External Dimension (L x W x H)	Less than 1.5 x 0.85 x 0.6 metres
2	Base Weight (including battery)	Less than 150 kg
3	Gross Vehicle Weight	Less than 300 kg
4	Ground Clearance	200 mm (Loaded)
5	Camera	Upgradeable as per requirement
6	Lens	6x Digital Zoom
7	Video Recording Resolution	4K (4096 x 2160)
8	Max Payload	Less than 300 kg
9	Max Incline	35 to 40 degrees
10	Max Speed	18 km/h
11	Steering System	4-Wheel Skid (Tank) Steering
12	Traction / Tires	22 inch Tires
13	Battery Chemistry	Li-Ion (Solid State optional) / Sealed Lead Acid Battery
14	Battery Capacity	180 Ah at 19 V
15	Charge Time	4 hours
16	Nominal Run Time	4 hours
17	User Power Output	5V, 12V Fixed (24V optional) — Li-ion NMC Battery: 4 hrs
18	Operating Ambient Temperature	-10 to 50 degrees C

No.	Feature	Specification
19	Storage Temperature	-20 to 50 degrees C
20	IP Rating	Upgrade to IP 65 Available
21	Communication	Terrain Map, Compass Orientations, Remote Control, Radio Frequency based Image and Video Transmission

6. ROBOTIC SOLUTIONS & INDUSTRIAL AUTOMATION

DTown Robotics designs and deploys custom robotic automation solutions of all sizes across various industries. Being brand-agnostic, DTR collaborates with multiple leading manufacturers to deliver the best solutions aligned with each client's specific application requirements. Current customers leverage robotic systems for picking, packaging, palletising, automated loading, unloading, and other operational tasks.

Benefits of Robotic Automation

Flexibility

Advanced robotic systems handle a wide range of materials and requirements with minimal downtime and without the need for frequent reprogramming.

Accuracy and Consistency

Robots execute tasks with precision, following instructions step-by-step without deviation. Smart systems can adapt to variables and self-correct when needed, operating without fatigue, distraction, or human error.

Scalability

Robotic systems can run continuously at varying speeds to meet demand. They can also be modified to integrate additional equipment into a central control system.

Increased Throughput

Automated robotic systems make production schedules more predictable and streamlined, enabling businesses to meet quotas and fulfil orders on time.

Reduced Labour Costs

Robots reduce the need for repetitive manual labour, lowering staffing costs and enabling technicians to focus on higher-value tasks.

Improved Safety

Robotic processes reduce employee exposure to hazardous equipment. Enhanced ergonomics protect workers, reducing liability and healthcare-related expenses.

Minimised Product Damage

Robotic systems are equipped with sensors and programmed for precise movements, ensuring careful handling of products throughout picking, placing, and packaging.

7. CASE STUDIES

Case Study 1: Revolutionizing Agriculture with Precision Drone Technology

DTown Robotics partnered with a leading agricultural company to implement precision drone technology for crop monitoring and management. The drones provided real-time data on crop health, enabling farmers to make informed decisions about irrigation, fertilization, and pest control. The result was a significant increase in crop yield and a measurable reduction in resource usage, demonstrating the transformative impact of drones in agriculture.

Case Study 2: Skill Development for the Next Generation

In collaboration with the Ministry of Tribal Affairs and IIT Roorkee, DTown Robotics launched a series of skill development robotic labs focused on drone technology and robotics. These courses provided students in tribal areas with hands-on experience and knowledge, preparing them for careers in the burgeoning field of robotics and automation. The initiative bridged the gap between academic learning and industry requirements, ensuring a skilled workforce for the future.

8. PARTNERSHIPS & RECOGNITIONS

DTown Robotics is recognised and supported by leading government bodies, premier academic institutions, and national industry associations, reflecting its credibility and growing footprint in India's robotics and drone ecosystem.

• NASSCOM Foundation	• Agnii — DST Innovation Cell
• MeitY (Ministry of Electronics & IT)	• Startup India (Government of India)
• SIDM — Society of Indian Defence Manufacturers	• CII — Confederation of Indian Industry
• Amazon Prime Video	• IIT Roorkee
• AIM — Atal Innovation Mission	• Ministry of Tribal Affairs
